

SUCCESS!!

Today I get to step outside and enjoy a 3 mile brisk walk without pain. For the past 15 years walking less than one mile would create debilitating hip pain.

I came to Harbor Bay Chiropractic after years of trying other chiropractic care and muscle relaxants. What is different at Harbor Bay Chiropractic is that the whole person is treated. Always checking first that your Atlas, the first bone of your neck, was in and working our way down the spine. Being realistic about the time commitment to make the change and showing up for scheduled visits.

Dr. Stacy takes the time after every treatment to review what areas of the spine were treated. The examination room has a posted anatomy chart and patient and Doctor review the chart and those areas affected and the nerves involved.

Thank you Harbor Bay Chiropractic – I look forward to my next visit and taking a ride on your moving examination table!
