

# SUCCESS!!

Print Name Lillian Beach Treatment Completed 2018

My child began chiropractic care with the present conditions of a tongue and lip tie. She also had food intolerances, refused to breastfeed, colicky, abdominal pain, diarrhea, eczema, diaper rash and poor weight gain. She had suffered with her symptoms for nearly 2 months. Prior to seeking chiropractic care we tried to seek treatment for her conditions by taking her to the pediatrician, pediatric dentist, and pediatric gastroenterologist. She has had a tongue and lip tie revision and tried a total elimination diet.

The staff at Harbor Bay Chiropractic Clinic is clearly very caring and friendly. The care that my child liked most was getting relief and finding healing. The thing she liked least about her care was having tension addressed... which can be aggravating.

Lily's results have been remarkable while under HBCC treatment. She is happy and gaining weight again! The difference in her health and disposition is truly remarkable. We owe Dr. Stacey Dent a debt of gratitude!

We highly recommend HBCC. I cannot imagine how my baby's well-being would be without them!

*I hereby give my permission to publish my success story in whole or to summarize its contents in any of the publications of Harbor Bay Clinic of Chiropractic.*
